CREATIVE OUTDOOR ADVERTISING

**2 BRAND NEW BACK-TO-BACK
DIGITAL BULLETINS ON THE 710 FWY!**

Based in Los Angeles, Bulletin Displays has recently built two brand new Watchfire 14'x 48' Digital units located at (710 FWY, S/O Imperial Hwy-NF & SF) and are now immediately available. (#70116 & #70117)

These brand new digitals are what industry vet, Rick Robinson has coined as “Windshield Crackers” because it’s at the outside of a curve. This unit literally crosses your windshield from the East line to the West line as you head South on the 710 Fwy. 85’ in the air, these units are viewable from half a mile away and target commuters heading North/South to DTLA from Long Beach

Bulletin Displays continues to add new Digital and Static units to it’s more than 200 faces in the Los Angeles DMA. 98% of our coverage is where advertisers want to be, on all major LA freeways.
